ABOUT US

About Indus

Our story begins as Hindustan Castings in the 1960s, we started manufacturing bicycle handlebar lugs in the 1970s.

Hindon Metaforms was established in 1990. Over the years we expanded our business, and our single unit developed into four well-equipped and professionally managed units.

Indus and Orkan are well-known brands in the bicycle industry for good quality bicycle parts and bicycles. Today we are manufacturing all types of hubs, CWC, bicycle frames and bicycles, besides forging and machined auto parts.

We believe that quality customer service, R&D and value for money are our three pillars of growth. We keep updating our product according to the market's requirements.

OUR VALUE

Cycling isn't just fun, it is immensely rewarding in several ways. Cycling spurs motor development in kids, increases their confidence and sense of independence, and instills the desire to explore. For adults, cycling is a getaway from life's daily hustle and bustle. We believe in making life better by cycling. We take immense pride as we enable our users to improve their lives physically and socially. Our goal is just to make lives better in the simplest way we can, that is cycling.
